"Clearwater's constant discussion of client success, and track record with other clients in the government space converting gave us the vote of confidence we needed to move to Clearwater. We are excited to be able to significantly boost productivity within our finance function. Our county is especially thrilled to move our investment operations to the cloud."

Matt Jennings, County Treasurer & Tax-Collector
Riverside County, CA

Automated Accounting and Reporting

- The gold standard for investment accounting
- Customized general ledger entries formatted to accounting systems (system agnostic)
- GASB disclosure reports available at the click of a mouse
- The only system that shows accounting values and market analytics together
- Interest allocation and accounting to track pooled fund participant balances and accruals

Modernize and Eliminate Manual Processes

- Ingests daily trading data automatically which results in little to no manual trade input
- Daily reconciliation and validation checks between all participants in the investment process (custodians, third-party managers, trading platforms, etc.) that eliminates manual period-end processes
- Flexible and on-demand reporting for oversight committees, audit purposes, and any ad-hoc needs

Simplify IT Architecture with Cloud Technology

- Multi-tenant, single instance SaaS solution with no IT infrastructure or maintenance required
- No limit on number of users
- Unlimited access to asset class and subject matter experts including a dedicated support team assigned specifically to each client
- Save money on system maintenance, support staff, and resources needed to support multiple installed systems

Automated Data Aggregation

Clearwater builds and maintains hundreds of connections to investment managers, fund administrators, custodians, brokers, and data vendors. This provides a centralized system for back-office and security master data.

Data Reconciliation and Validation

Clearwater reconciles cash, positions, and transactions between various sources (investment managers, custodians, and others). Clearwater has teams dedicated to enriching and standardizing security master data for various asset classes, including accounting and performance verifications.

Portfolio Accounting and Reporting

These processes feed Clearwater's multi-asset class, multi-currency, multi-basis investment accounting and performance system, which produces accruals, book values, market values, and other accounting data needed to drive both the daily trading cycle, as well as the other reporting and analysis functions.

Partnering with Clearwater

- 1 Clearwater automatically gathers data with over 1,250 existing custodian feeds and works with over 40 third-party data providers to create and maintain data feeds on clients' behalf on a daily basis.
- 2 Clearwater's data management and reporting tools facilitate efficient and scalable reporting processes at period-end and give Clearwater clients confidence they are basing strategic investment decisions on accurate and up-to-date data.
- 3 Flexible reports eliminate unnecessary manual data work, improve portfolio analysis, and produce entries and regulatory reporting with the click of a button.
- 4 Clearwater's client servicing personnel operate under a team servicing model. This provides users with a dedicated group of system and industry experts devoted to ensuring their data is accurate and updated each day.
